

- Avoids annoying re-positioning when tightening screws with Wera torque screwdrivers with pistol handle
- · Fast and fatigue-free work due to precise free-running mechanism
- Maintenance-free constructon with especially slim and solid bearing by leading free-running manufacturer
- Maximum transmissable tightening moment 10,0 Nm
- Bit mounting with Rapidaptor technology for rapid bit change, suitable for bits with 1/4"- external hexagon drive as per DIN ISO 1173-C 6.3 and E 6.3 and Wera connection series 1 and 4

The free-running feature allows for a particularly quick return movement without having to remove the screwdriver when tightening screws. Especially for application with Wera torque screwdrivers with pistol handle for fast and ergonomic working. The Rapidaptor technology allows mounting bits without activating the sleeve. Remove the bits by simply pushing the sleeve forward - for rapid bit change, all with one hand.

889/4/1 F Rapidaptor free-running bit holder for torque screwdrivers with pistol handle, 1/4" x 64 mm Rapidaptor Bit Holders

The free-running feature

For tools with pistol handle

Magnetic

The free-running feature allows for particularly quick return movement without having to remove the screwdriver when tightening screws.

Chuck-all

The Rapidaptor quick-release chucks hold $\frac{1}{4}$ " DIN ISO 1173-C 6,3 and E 6,3 as well as Wera series 1 and 4 bits.

The free-running feature allows for particularly quick return movement without having to remove the screwdriver when tightening screws.

Every function of the Rapidator quick-release chuck, such as inserting or releasing bits, can be carried out with one hand. This is faster, more economical and more ergonomic. There are no unnecessary manoeuvres.

Escpecially for applications with Wera torque screwdrivers with pistol handle for fast and ergonomic working.

Rapid-in and self-lock

The bit can be pushed into the adaptor without moving the sleeve. The lock is activated automatically as soon as the bit is applied to the screw. Bits are held securely and wobble-free.

Bitholders, magnetic, for easier application of the screw

Rapid-out

Simply push the sleeve forward to change the bit. The spring mechanism lifts the bit off the magnet and unlocks the tool. The bit can be easily removed. The rapid-out function makes it easy to remove even the smallest bits without extra tools.
