Bit-Checks / Bit-Safes Universal

EAN: 4013288190857 **Size:** 70x65x20 mm

Part number:05057429001Weight:121 gArticle number:Bit-Check 12 Universal 2Country of origin:CZ

Customs tariff 82079030

number:

• Upright positionable, multi-component Bit-Check

- Tough viscous bits for universal use
- Ring magnet Rapidaptor, holder for holding even longer and heavier screws
- For use with power tools
- In handy and robust Bit-Check

Robust Bit-Check by Wera. Bit-Checks provide a quick overview of the tools available. Bits not needed are simply reinserted into the set and do not get lost. Simple transportation e.g. in the shirt pocket. Includes universal holder with ring magnet - which very securely holds even heavy screws - and Rapidaptor, which allows bits to be attached without any need to actuate the sleeve. The removal of the bit is simple, just by pushing the sleeve forward - for rapid bit change with just one hand. For the take-up of bits with 1/4" hexagon head drive as per DIN ISO 1173-C 6.3. Can be inserted in the power screwdriver or for use in the chuck of the electric drill. Comes with tough viscous TORX® bits for universal use.

 H Wera

At the workplace

The Bit-Checks can be positioned upright at the workplace so the tool is always quickly to hand.

Rapidaptor with ring magnet

The floating, free-turning magnetic sleeve securely holds even large and heavy screws to enable immediate application. There is no need to hold the screw when applying the tool - something which can be dangerous and painful. Also ideal for overhead

work.

V bits for square recess screws

V bits have a conical profile. The clamping forces thus resulting hold Robertson screws securely on the tip of the tool. Ideal for screwdriving at difficult-to-access places.

A-Bits

A stands for aviation. A bits are particularly hard bits with a sharpedged profile which e.g. penetrates screw profiles full of paint (such as on fuselage panels) ensuring a dependable transfer of force between the bit and the screw.

Tough-absorbing bits

Tough-absorbing Wera bits (Z) prevent any premature breakage of the drive tip.
